

FOOD SCRAPS DON'T BELONG IN THE LANDFILL!

Community Roots Farm wants to turn your food scraps into compost to produce more food, not methane!

Methane is a terrible greenhouse gas that is 28-36 times worse than CO2 for trapping heat in the atmosphere.

***Bring us your fruit and vegetable scraps!
Bucket drop-offs Sundays 11am-2pm .***

*Drop and go, or stay and grow.
Volunteer with us after you drop your bucket.*
